

Share Large Files with Firefox Send

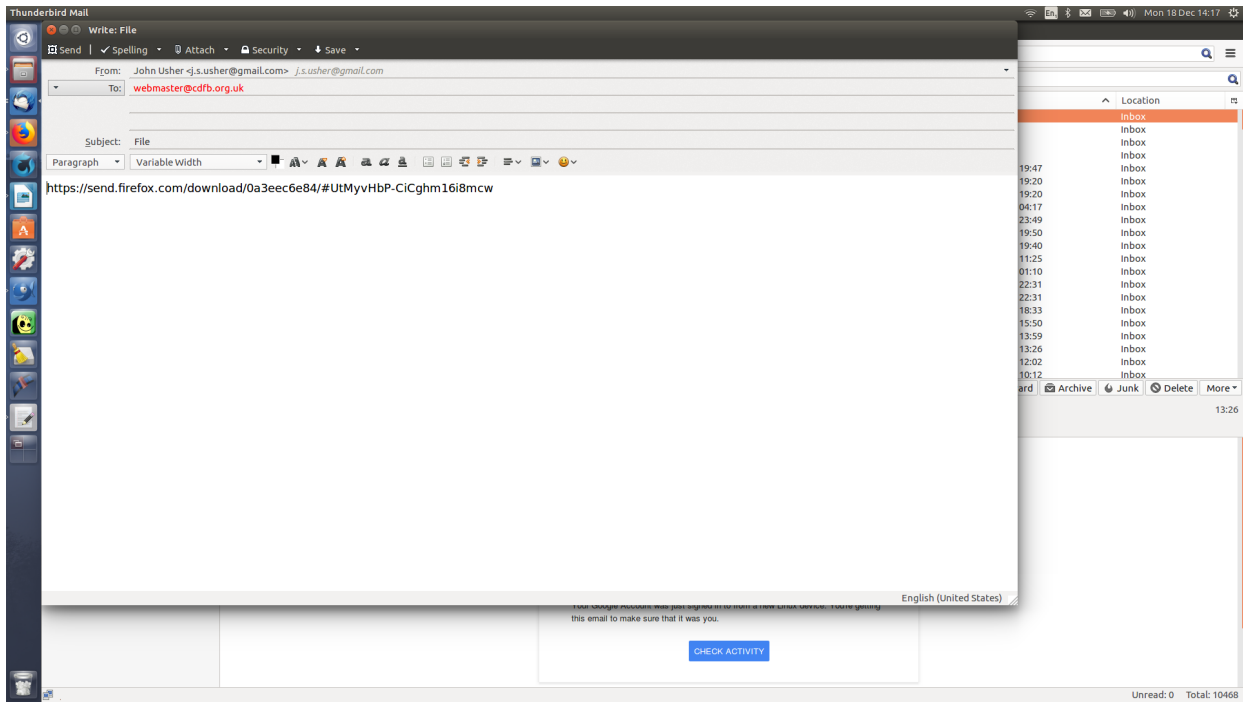

Firefox Send will work in any browser (not just Firefox). The link to your file will expire after 1 download or in 24 hours.

1. Go to the Firefox Send homepage (<https://send.firefox.com/>). Drag and drop the file you want to share into the browser window. It can help to resize the browser window. Large files may take a long time to upload.

2. When the file has uploaded click the Copy to clipboard button to copy the link.

3. Paste the link onto an email addressed to the person you want to share the file with.

Note, *the link to your file will expire after 1 download or in 24 hours*. So, you can only share the file with one person and you can't test the link to see if its worked.

Finished.
